(20 marks)

1. Read the passage given below :

- 1 World Conservation Day is celebrated internationally to increase awareness about the best practices needed to protect our natural resources. The Earth is supplied with a limited amount of resources that we all rely upon, like water, air, soil and trees. The World Nature Conservation Movement is a great opportunity to celebrate the progress we've made and determine to take action, wherever needed. It is time to remind ourselves that we need to give back to nature instead of just using resources without thinking about conservation. There is a need to replenish and recycle the resources we consume from nature.
- 2 Our forests, rivers, oceans and soils provide us with the food we eat, the air we breathe, the water we irrigate our crops with. We also rely on them for numerous other goods and services. We depend on them for our health, happiness and prosperity. We have a cycle of biodiversity which needs proper conservation.
- 3 The population explosion remains one of the major reasons why natural resources are getting depleted at a very fast rate. Technological advancement and luxurious lifestyles have led to several environmental problems like global warming, ozone layer depletion, river water pollution and deforestation, which threaten the planet's future.
- 4 Humans, animals, marine creatures and the environment, all need to be protected and conserved for the planet's future well-being. There are many examples of conservation. One is a programme to try to preserve wetlands, or a programme to try and save old buildings. Another example is of an attempt to minimise the amount of electricity used by turning off lights when leaving a room, or an attempt to turn off the running tap to avoid wastage of water. There are lots of examples like these which need implementation.
- 5 Following these small steps in our daily lives we can help to maintain the balance of nature, thereby saving humankind from the kinds of natural disasters we may face in the near future.
- 6 Nature also has a profound impact on our minds and our behaviour, helping reduce anxiety, brooding, and stress and increase our attention, capacity, creativity and ability to connect with other people. So there is a need to save nature if we want to save life as the two are interconnected and need each other. If we hurt or destroy the environment, surely we will be ruined. We must create awareness among family members, and try and practise a sustainable lifestyle to protect and conserve nature.

2. Read the passage given below :

- 1 Nowadays companies demand an outstanding job performance by every single employee to be better than that of their competitors because there is competition among enterprises. The employers make efforts to motivate the employees and optimise performance.
- 2 There are numerous factors affecting job performance. These can be divided into external and internal factors. The internal factors are team spirit, competent boss, respect from colleagues and job satisfaction. The external factors are chance for personal development, job security, promotion prospects and monetary incentives. The decisive determinant is that the employees remain highly motivated. One possible method to increase motivation is the salary. Employees are willing to stay longer hours in the office and perform better, when they have the chance to get financial rewards, for instance, a higher salary or bonuses.
- 3 The bar graph (given below) shows the result of a survey conducted among workers in a company to analyse their work performance across ten different factors that contribute to make their work environment pleasant. The workers are grouped into two categories — those between the ages of 18 – 30 and those between 45 – 60. Interestingly, in six out of the ten factors surveyed, the 18 – 30 age group is shown to be more affected than the 45 – 60 age group. Factors, besides the salary, which affect the work performance of the two different age groups are interesting. These factors are the chance for personal development, relaxed working environment, promotion prospects, job satisfaction and monetary incentives. Furthermore, two out of the remaining four factors namely, team spirit and work environment have been equally influential among the two groups. The 45 – 60 years workers are impacted a lot by ‘respect from colleagues’ whereas the prospect of a promotion is an important reason that drives younger employees to work better.

- 4 Job performance of happy employees is 31% more productive and they show three times more creativity than their unhappy counterparts. They are more resilient and more likely to stay in the same company for a longer period. Consequently they drive the company towards long-term goals by being more productive and efficient.
